# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 1,000 in India for the week ending the 31st March, 1951.

Explanation of symbols used :—B.=Births ; B.R.=Birth rate ; O.=Cholera ; S.=Smallpox ; P.=Plague ; F.=Fever ; D.D.=Dysentery and Diarrhoea ; R.D.=Respiratory diseases ; M.D.=Maternal Deaths ; D.R.=Death rate ; I.D.=Infantile Deaths (included in total deaths).

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 31st March, 1951, relate to 145 towns with an estimated population of 15,976 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 62% of the total number of towns representing 55% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 11,007 and 6,451 representing birth and death rates of 36.1 and 20.9 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 125 towns with an estimated population of 13,220 thousands. Information about Assam, Bihar, Bombay and West Bengal could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 62% of the total number of towns representing 52% of the total population is covered. The numbers of births and deaths recorded in these towns were 9,699 and 5,531 representing birth and death rates of 38.2 and 21.8 per thousand of population respectively. The table at the end gives the position by States.

The towns of Akola in Madhya Pradesh, Karur and Tanjore in Madras and Cuttack in Orissa recorded high death rates of 50.0, 59.2, 54.9 and 50.8 per thousand of population respectively. In Akola and Cuttack, the high death rates were mainly due to deaths from Smallpox and fevers. There were a number of deaths in Karur and Tanjore but the high death rates there were not due to any one of the specified causes.

(B) States (Part B).—The data here relate to 20 towns with an estimated population of 2,756 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 63% of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,398 and 884 representing birth and death rates of 26.9 and 16.7 per thousand of population respectively.

No towns recorded a high death rate of 50 or over per thousand population.
